Tennis is a fantastic recreational sport. It gives children an interest, an opportunity to meet new friends and a healthy and active lifestyle. Discovering tennis at an early age can open new doors for children. It can show them how they can succeed, how to stretch their bodies and minds, and how to use their new skills in other areas of their lives. Through the Peewee-Tennis Program, tennis is promoted as a fun and dynamic sport- accessible for all children regardless of ability and background. It enables them to play tennis in all year junior programs and gain access to tennis anywhere in the country.
